Good Morning:

I am a Dominion Energy customer and am writing to strongly oppose the proposed solar choice metering tariff.

We installed a 7.2 KW solar panel system on our roof four years ago. We made this decision based upon existing policies and understood that these may change over time. However, the proposed rate structure is well outside of any that we could have imagined at the time and we would NOT have installed solar if we knew that this tariff was imminent.

I am astonished and disappointed that, after the nuclear plant debacle, the state would be considering policies that limit the production of clean energy, as the proposed tariff would certainly do.

South Carolina's existing home and business solar policies are something of which we can be proud. Please don't approve this tariff that would put us back years, impact jobs, and the ability of homeowners to make our own decisions.

Thank you.

Phil Turner
